NO TIERS • SAME FOR ALL

NEUROSCIENCE TEST • TECHNICAL & FINANCIAL OFFER

The brain behind the play.

The **PlayerDNA Neuroscience Test** is an AI-powered cognitive assessment that measures the mental side of football — decision speed, scanning, reaction and composure under pressure — the cognitive engine that picks the right position and the right decision. Delivered from a single session, with a coach-ready report.

PRICE	HARDWARE	TURNAROUND	OUTPUT
USD 50 / player (flat)	None — any device	Results in minutes	Cognitive report + dashboard

— 01 • TECHNICAL • WHAT IT ANALYZES

Nine cognitive dimensions, scored for football.

Each dimension is scored 0–100 and percentile-normalised for the player's age and level, then mapped to the cognitive demands of their position.

01

Decision Speed

How fast the player reads a situation and chooses the right action.

Midfield • attack

02

Reaction Time

Speed of response to a visual or game stimulus.

Goalkeeper • defence

03

Visual Scanning

How often and how effectively the player scans before receiving the ball.

Midfield

04

Peripheral Vision

Awareness of play happening outside direct focus.

Playmakers

05

Concentration & Focus

Sustained attention and consistency across the full match.

Defence · GK

06

Motor Perception

Perception-to-movement coordination — seeing and acting as one.

All positions

07

Tactical Awareness

Reading patterns, positioning and game IQ.

Midfield · defence

08

Anticipation

Predicting the next phase of play before it happens.

Defence

09

Pressure Response

Decision quality under fatigue, crowd and game pressure.

All positions

Cognitive demands by position

POSITION	PRIMARY COGNITIVE PROFILE MEASURED
Goalkeeper	Reaction time · concentration · pressure response
Defenders	Anticipation · concentration · tactical awareness
Midfielders	Visual scanning · decision speed · peripheral vision
Attackers	Reaction · fast decisions · creativity under pressure

How it's delivered, and what you get.

SPECIFICATIONS

Test & technology

- ◆ **Delivery:** app / camera-first — runs on any device, no hardware required.
- ◆ **Method:** AI-powered proprietary cognitive-performance metric.
- ◆ **Standards:** reaction-time & scanning aligned to published norms (Deary).
- ◆ **Scoring:** 0–100 per dimension, percentile-normalised by age & level.
- ◆ **Turnaround:** results generated within minutes of submission.
- ◆ **Security:** GDPR principles · SOC 2 · HIPAA-aligned; guardian consent for minors.
- ◆ **Languages:** report available in English & Arabic.

DELIVERABLES

What the player & academy receive

- ◆ **Neuroscience score** (0–100) with a cognitive radar.
- ◆ **Per-dimension breakdown** across all nine dimensions, with percentiles.
- ◆ **Position-fit cognitive insight** — which roles the player's mind suits.
- ◆ **Development notes** — what to train to raise each score.
- ◆ **Dashboard entry** + inclusion in the professional report.
- ◆ **Exports:** shareable PDF and CSV/JSON data.
- ◆ **Access:** the report stays available for 12 months.

One flat rate. No tiers.

A simple, transparent price for the standalone Neuroscience Test — the same rate for an individual player or a full academy squad.

\$50 / player

FLAT RATE • ONE ASSESSMENT

Everything included

One full neuroscience assessment per player, with the complete cognitive profile, report and dashboard entry.

- ✓ 9-dimension cognitive profile
- ✓ Cognitive radar & scorecard
- ✓ Position-fit insight
- ✓ Development notes
- ✓ Professional PDF report
- ✓ 12-month report access

TERM	DETAIL
Unit price	USD 50 per player — flat, regardless of squad size
Scope	Standalone Neuroscience Test (one assessment, one report per player)
Individuals & academies	Same flat rate; squads billed at USD 50 × number of players
Delivery	Digital — results within minutes; no hardware required
Taxes	Exclusive of VAT / local taxes
Payment	Per engagement / on order
Offer validity	60 days from the date of this offer
Add-on note	Also included free within the full 18-protocol assessment; this rate is for the test purchased on its own

Example. A 40-player squad = $40 \times \$50 =$ **USD 2,000** for the full squad's neuroscience profiling. All prices in USD, exclusive of taxes.
